

# Substantial Safety Benefits from Ten More Feet

**1.3** BILLION  
MILES  
& **6.6** MILLION  
TRIPS SAVED

**912** FEWER  
CRASHES  
on America's highways

Extending the length of twin trailers from 28 to 33 feet  
**WILL MAKE OUR HIGHWAYS SAFER.**

Studies of twin trailers at the University of Michigan and the Wisconsin DOT show that the extended wheelbase of the twin 33s makes it more **stable** and **safer** than the twin 28s.

It is time to introduce a new era of efficiency to the market through a ten foot extension on twin trailers.
